Data Stored in database –

The screenshot shows the phpMyAdmin interface for a database named 'data'. The table 'workshopdata' is selected. The interface includes a sidebar with a tree view of databases and tables. The main area displays the table structure and data. A message at the top states: 'Current selection does not contain a unique column. Grid edit, checkbox, Edit, Copy and Delete features are not available.' Below this, a green bar indicates 'Showing rows 0 - 5 (6 total, Query took 0.0007 seconds)'. The SQL query 'SELECT * FROM `workshopdata`' is shown. Below the query, there are controls for 'Show all', 'Number of rows' (set to 25), and a 'Filter rows' search box. The table data is displayed in a grid format with columns: firstName, lastName, email, Gender, and date2. Below the table, there are controls for 'Show all', 'Number of rows' (set to 25), and a 'Filter rows' search box. At the bottom, there are sections for 'Query results operations' (Print, Copy to clipboard, Export, Display chart, Create view) and 'Bookmark this SQL query' (Label, Let every user access this bookmark, Bookmark this SQL query button).
